## Efficient vehicle lettering – low cost, easy and quick

### Top-class vehicle drawings – the professional basis

True-to-size, scalable vector drawings are the basis for professional car lettering and car wrapping. Views from the front, rear, right and/or left side and above provide you with all you need to plan and implement your plans.

Our newly developed vehicle search facility with lots of practical functions will save you time and deliver the right drawing for your project with just a few clicks.

### Create a professional design

Place your design on the individual views. With one click you can select the painted surfaces of the car and colour them. You can hide or display entire views. Practical groupings will make your work easier. Rearrange the views to get an overview for your production. You can create prints and simply hide the view for the presentation. This is how you work efficiently!

### Persuasive presentation

Impress your customers with a quick and compelling presentation of your designs. CAR-SPECIAL offers you lots of options for this:

The scale usually allows you to create a printout on A4 paper, so you can hand over the design to your customers or the PDF will print correctly on your customer's printer.

If you utilise the 3D presentation, you will impress your customers with just a few clicks. It is very simple: You can carry on working and do not need any additional software.

### Clean production

The use of professional vehicle outlines means you get faster results and have less film waste. This makes work more enjoyable and profitable. Good preparation is the key to production.

The true-to-scale data allows you to plan properly and print and plot efficiently. Give it a try. You will find test files at: [car-special-cloud.de](http://car-special-cloud.de)

Cars, delivery vans, trucks, camper vans, buses, coaches, trams, trailers, containers, aircraft, bikes, boats ... you will find them all.

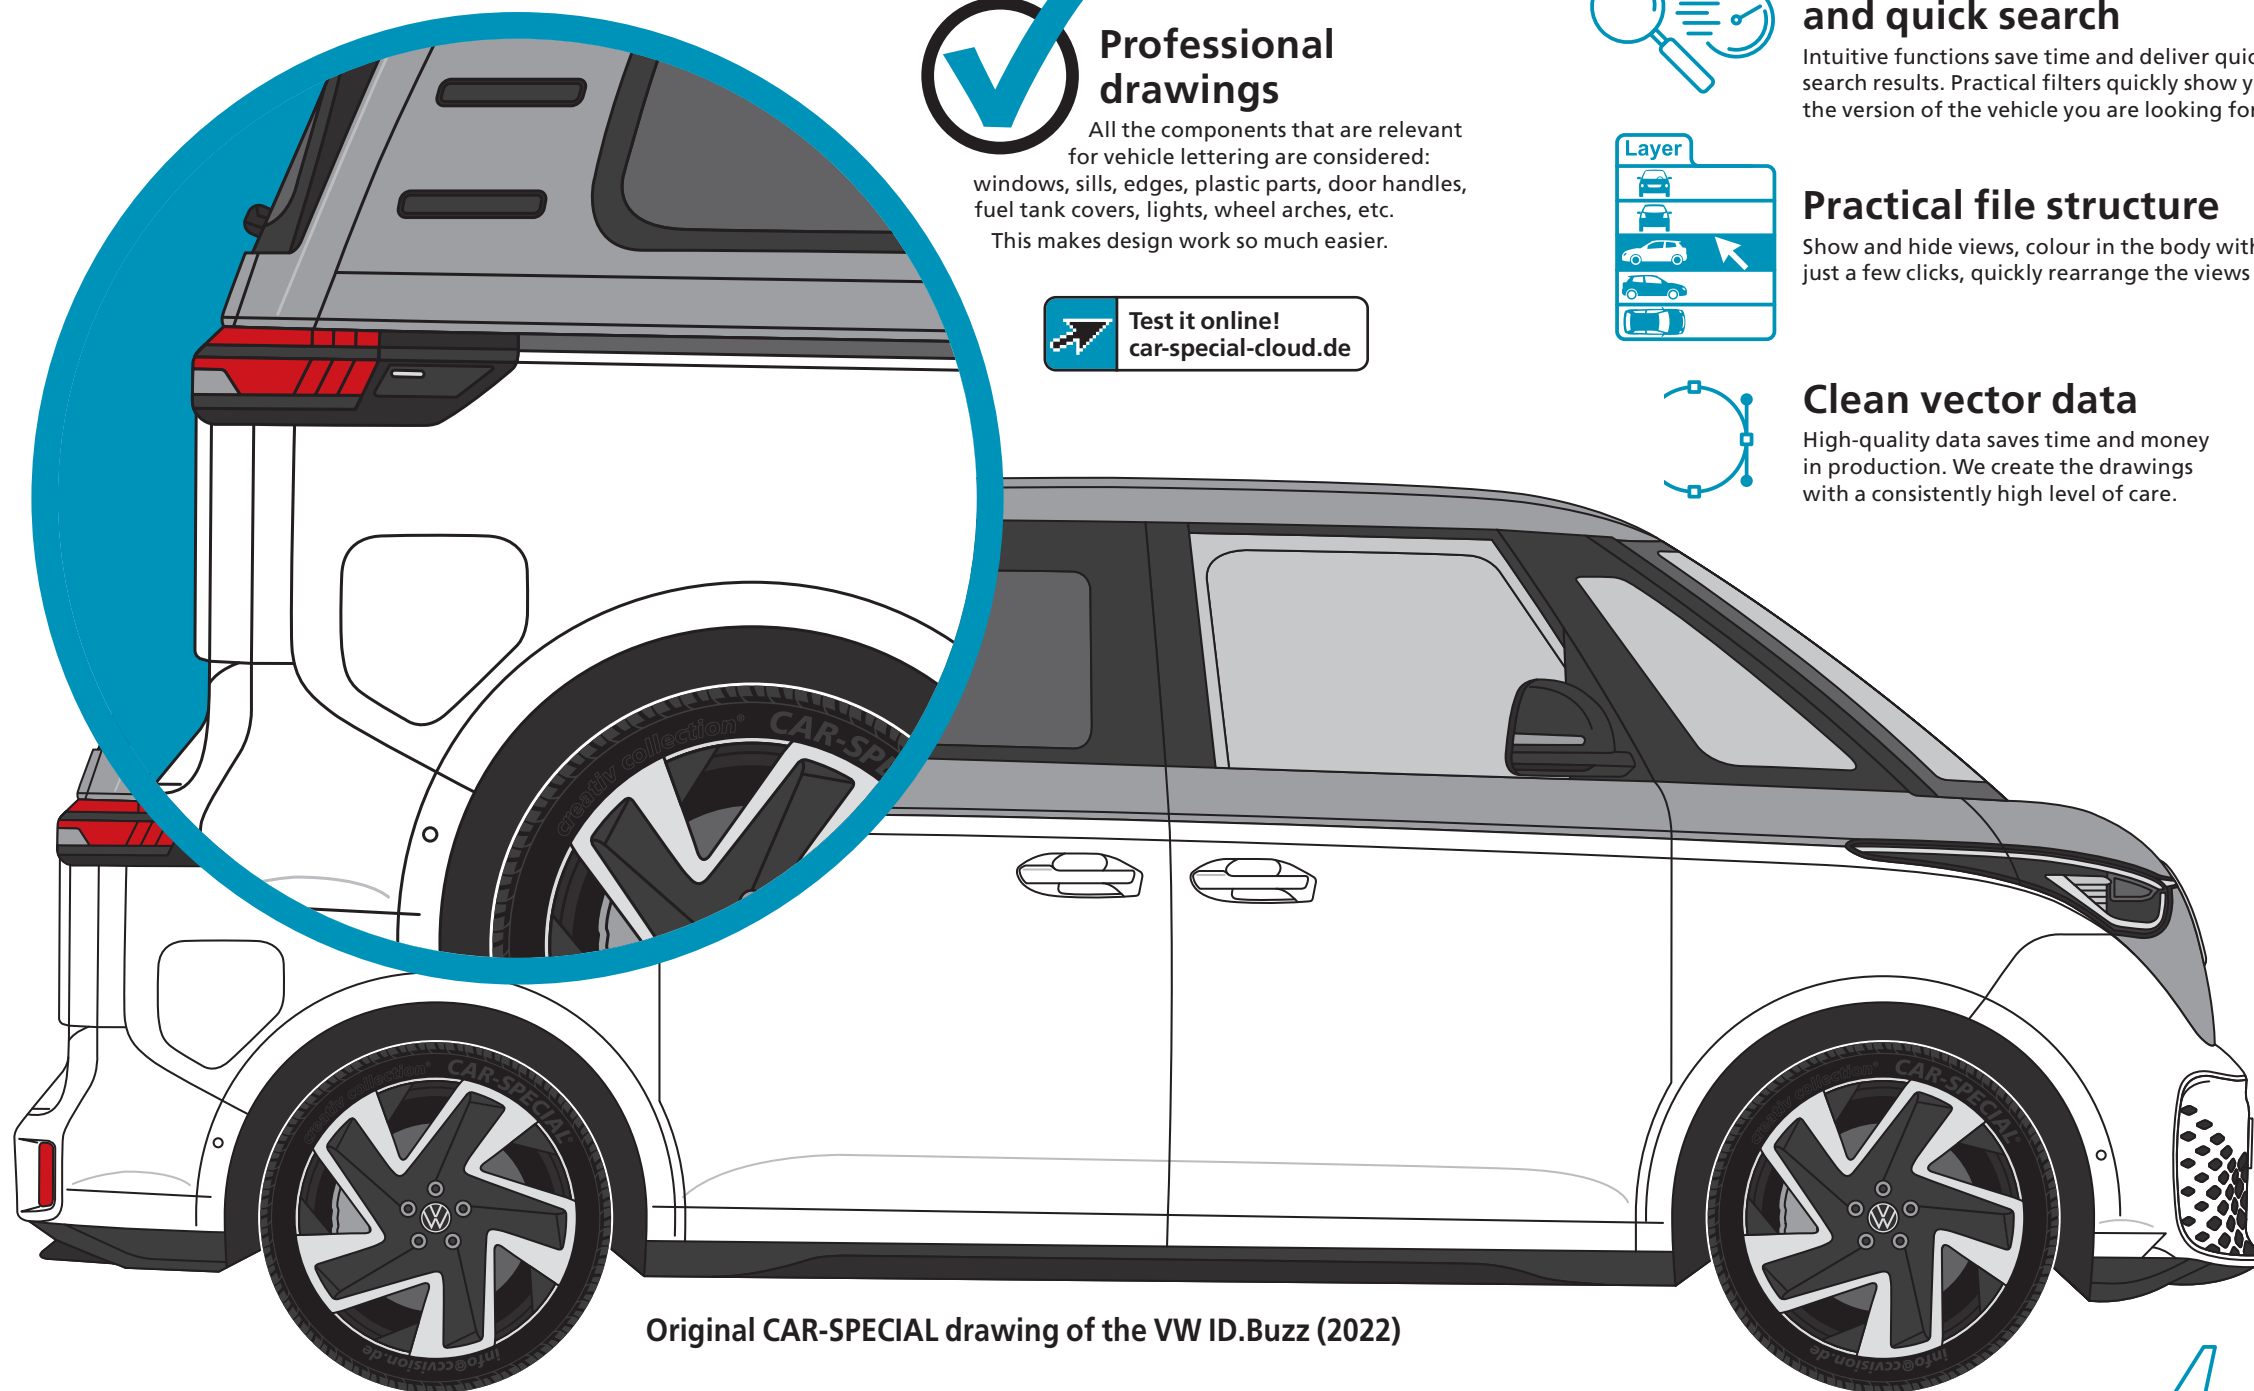

# CAR-SPECIAL®

## Up-to-date and unique – from design to production indispensable

The CAR-SPECIAL vehicle drawings offer you lots of advantages. They make your daily work easier and save you time so that you can concentrate on other things. From design and presentation through to production, you will benefit from our true-to-scale drawings. In addition, you are provided with a vast range of possibilities for presenting your work profitably. Utilise these possibilities!

Original CAR-SPECIAL drawing of the VW ID.Buzz (2022)

### Professional drawings

All the components that are relevant for vehicle lettering are considered: windows, sills, edges, plastic parts, door handles, fuel tank covers, lights, wheel arches, etc. This makes design work so much easier.

Test it online!

### Very latest vehicles

With CAR-SPECIAL you are always right up-to-date because we constantly draw new vehicles and make them available for you to download.

### Convenient and quick search

Intuitive functions save time and deliver quick search results. Practical filters quickly show you the version of the vehicle you are looking for.

### Practical file structure

Show and hide views, colour in the body with just a few clicks, quickly rearrange the views ...

### Clean vector data

High-quality data saves time and money in production. We create the drawings with a consistently high level of care.

### Display-friendly scale

Cars and delivery vans in 1:30; trucks, buses and larger vehicles in 1:60. Aircraft in 1:300. This allows you to create your design in a "handy size" and you can usually present it on a sheet of A4 paper.

### Attractive 3D presentation

Your customers will be impressed! In just a few minutes you can present your design in an ultra-modern way with our free 3D tool – and also stay on top of your workflow.

### Online design for quick layouts

With the CAR-SIGNER you – maybe even with the customer – can quickly decide what the rough design should look like.

### Compatible formats

CAR-SPECIAL is suitable for any workflow and any standard program: AI, CDR, EPS, DXF (CDR also in 1:1 representation).

### Best possible basis for production

Using professional vehicle outlines means you get faster results and have less film waste.

### Personalisation to attract attention

Simply upload your company's logo to the CAR-SPECIAL Cloud and to the 3D presentation-tool to attract your customer's attention.

### Free hotline

Personal, fast and competent, our staff will be happy to help you: 0049 (0)761 47924-0 • [info@ccvision.de](mailto:info@ccvision.de)

### All vehicle types are included

Cars, delivery vans, trucks, camper vans, buses and coaches, trams, trailers, containers, aircraft, bikes, boats ... you will find them all.

# CAR-SPECIAL®

## The best vehicle search

With us you will not search for long and will quickly find what you want. With our practical features, filters, array of information and comparison options, we ensure that you can get back to your real work as quickly as possible. With just a few clicks you can download the vehicle drawing you want and begin your design and start preparing your production straight away. Try it yourself for free and with no obligation: [ccvision.de/en/car-special](http://ccvision.de/en/car-special)

### The very latest models always on display

On the CAR-SPECIAL homepage you will find the very latest vehicle drawings that we have just drawn. One click will show you all available versions of each model range. The search function and selection by manufacturer and model is also available instantly.

### Search function with direct suggestions

As soon as you type a few letters, you will be shown suggestions. Just one click takes you to the result. An example: If you type "spr", you will immediately be given the suggestions "Dacia Spring" and "Mercedes-Benz Sprinter".

### Search history "recently searched"

It is frequently the case that you require a model that you used recently. The "recently searched" function (for subscribers only) shows you your personal search history.

### Practical filters

To allow you to find the right model faster, particularly in the case of delivery vans and commercial vehicles, simply select features such as van/transporter, station wagon, platform, limousine, convertible..., length and height based on the model or entered in mm ..., number of doors at side and rear ..., windows at left, right, rear.

### Detailed vehicle description

By providing details of the model, facelift, doors, windows and useful tips, we show you all the information about the vehicle. This means you can be sure you are choosing the right vehicle. The length, width, height and wheelbase dimensions also help.

### Show differences

Have you already used the filters to reduce the number of variants of a vehicle from 110 to 5? You can now highlight the differences between the individual vehicles (for subscribers only), so you can see instantly which variant you require. Very practical!

### Compare with photos

Upload photos of the vehicle to be labelled and they will then be placed right next to the vehicle drawings. This is the best way to compare and be confident that you have found the customer's exact vehicle. The photo comparison is clearly structured with the front, rear, left, right and roof.

### Easy project organisation

Collect vehicle drawings in lightboxes for each project or for each customer, for example. Simply drag & drop a vehicle drawing to the appropriate lightbox and that's it.

### Quickly estimate film requirement

Each vehicle can be measured online (for subscribers only), so that you quickly know how much film is required and how the vinyl rolls need to be arranged. This information will allow you to make appropriate plans early on in any project.

## 3D presentation included

CAR-3D allows you to create a modern and professional presentation. You do not need any additional software or knowledge of specific programs. With just a few mouse clicks you can create a perfect, compelling presentation with your logo and individual background motifs or 3D surroundings.

Export your finished presentation as an image and include it in your quotation for the customer, for example. Simply send your customer a link to the 3D view. Your presentation could not be more impressive.

Different backgrounds are available. But you can also upload your own photos.

In addition, you can choose between different 3D surroundings that look great in any position.
